

# DIY FORTUNE TELLER

## TO MAKE THE FORTUNE TELLER:

1. Cut out the large dotted square at the top of the paper.
2. Fold the paper in half (corner to corner) so that it becomes a triangle.
3. Fold the paper in half again (corner to corner) so that it becomes a smaller triangle.
4. Open up the square. You should have creases (marked in the drawings by a dotted line) from your folds that make an 'x'. Fold the lower left hand corner in so that the point is in the center of the square.
5. Repeat step 4 for the other corners so that all the points come together in the center of the square.
6. Flip the square over. You should have creases from your folds that divide the square into four squares. Fold the lower left hand corner in so that the point is in the center of the square (like you did for step 5).
7. Repeat step 6 for the other corners so that all the points come together in the center of the square.
8. On the side with four squares write the name of color in each square. On the side with triangles write a number in each triangle.
9. Open it by folding out each side and write a fortune in each of the eight triangles that correspond with the numbers. Then fold the corners back in to the center like you did in step 6-7. Feel free to fancy up your fortune teller with washi tape + markers!
10. Push the four corners of the square into the center.
11. Pull out the flaps. Then slide your fingers into the flaps and push them in and out.

## TO TELL A FORTUNE:

12. Ask someone to pick a color then move the fortune teller in and out for each letter of the color ie: blue, you would move it four times.
13. Now ask them to pick a number and then move the fortune teller in and out according to the number they choose. You can repeat this a few more times if you'd like.
14. Now ask them to pick a number and unfold the fortune teller to reveal the fortune that corresponds to the number they choose.
